There are about 250 species of tortoises and turtles all around the world. They have lived on Earth for a very long time – for nearly 250 million years. However, more than 70% of the species are on a list of endangered species called the IUCN Red List of Threatened Species. This is due to the devastation of their environment, and the hunting and gathering of eggs. **Calculate the problems, match them with the letters (see the clue) and fill in the blanks with the information.**

THE TORTOISE FAIRY TALE

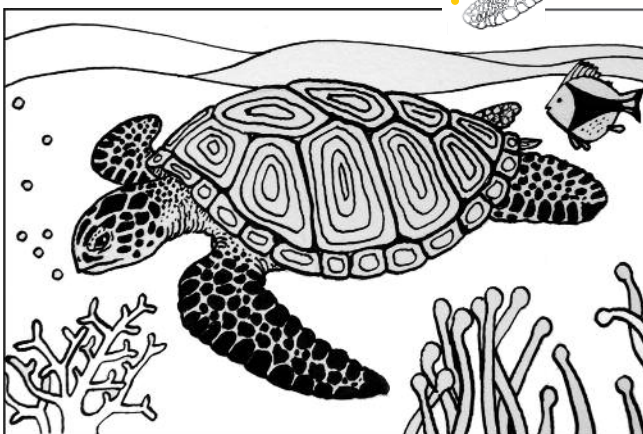

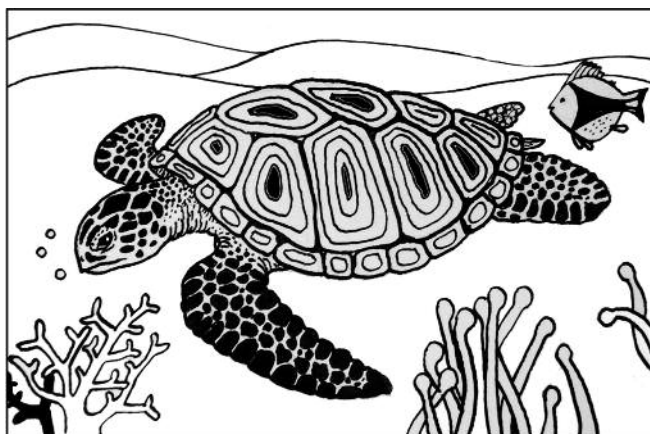

Once upon a time a  met a . The  was in a playful mood so she told the Hare: "I'm willing to wager that you won't be fast enough to run to that  and outrun me." "Are you kidding me? You must have hit your !" exclaimed the good runner .

"Dear Auntie, you must be tired today; I think you should go to sleep and take your mind of things." "I see you think I'm crazy. But I want to keep the bet!" replied the . The  accepted the challenge and both of them set off towards the . They decided on the prize for the winner. The  knew he would need only a couple of jumps to win the race therefore he stopped in the  to eat some juicy  and . He had faith in his victory over the . He decided to enjoy the  and to have a rest for a while. Meanwhile, the  moved to the tree at a walking pace. The  started to run but the turtle had almost reached the winning-post. The Hare ran like the wind but he did not manage to beat the . She reached the  first and exclaimed: "Well, wasn't I right? Your speed could not win the race. You wanted to be better than me? What would you do if you had to carry your  on your back as I do!"

Help the turtle find its way to the crab.
